Lightning Demos - 3 bedste eksempler

Jeg synes det er fedt, man ser personen, og man bliver guidet rundt, med menuen, og med pilen ned af, som giver brugeren, en klar ide om at scrolle.

Jeg synes måde der bliver linket videre til nye sider, er fed, fordi man for en fornemmelse på billederne af, hvad man kan opleve, hvis man klikker videre.

Jeg synes måden teksten og billede er nemt og overskureligt, da man får en slags visuel gave ved at læse teksten.
